Hi Dr Lee,

I'd like to book an appointment to have my asthma checked. I've had a cold with a runny nose over the past few days, and since then I've noticed some wheezing. I've also been waking at night with a cough and needing my salbutamol inhaler more often than usual.

I'm still using my usual cetirizine as needed for my hay fever. Nothing has changed with my medications otherwise.

Could you let me know when you have a time available?

Thanks,

Daniel Kim
