Community Nursing Service

Date: 30 August 2026

Patient: Samir Patel (55 years, male)

Location: Patient home

Reason for visit: Second dressing review.

Background: Type 2 diabetes, peripheral neuropathy. Recent lower leg cellulitis managed with oral antibiotics.

Wound review:

- Small dry scab noted.
- No surrounding warmth.

Clinical conclusion: Near resolution.

Management

- Wound reviewed; no medication changes at this review.
- Current oral antibiotic (clindamycin 450 mg three times daily) remains active as prescribed.
- Dressings continue as previously arranged.

Follow-up

- Community wound review completed today (30 August 2026).
- GP review after antibiotic course remains pending, due 3 September 2026.
- Prior safety-netting advice remains in place: escalate if redness spreads or systemic symptoms develop.
