Patient: Priya Nair

Age/Sex: 52 years, Female

Date: 28 August 2026

Service: Community Pathology Service

Clinical indication: Assess response to dose increase.

Investigation: Repeat thyroid function

Results

- TSH: Final - improved into the laboratory reference interval.
- Free T4: Final - within the laboratory reference interval.

Interpretation

The TSH has improved into the laboratory reference interval and Free T4 is within the laboratory reference interval. These findings are consistent with a response to the dose increase.
