GP Results Note - 28 July 2026

Patient: George Martin, 65-year-old male

GP: Dr Felicity Jones

Reason for review

Results review following blood tests for progressive fatigue.

History

Consulted on 25 July 2026 with progressive fatigue and reduced exercise tolerance. No overt bleeding reported. Background of hypertension and gastro-oesophageal reflux disease. No known drug allergies. Previously independent with no known anaemia.

Results available

Blood tests 27 July 2026 (Community Pathology Service):

- Full blood count: final - microcytic anaemia
- Ferritin: final - low

Conclusion: iron-deficiency anaemia.

Assessment

Iron-deficiency anaemia. On review today, no haemodynamic instability and no visible bleeding.

Plan

- Start oral iron.
- Refer for gastrointestinal investigation (gastroenterology assessment and colonoscopy). Referral to Metro South Gastroenterology Clinic, due 9 September 2026 - outstanding.

Medication changes

- Ferrous sulfate 325 mg once daily - started 28 July 2026 for iron-deficiency anaemia.
- Continue lisinopril 10 mg once daily and pantoprazole 40 mg once daily.

Follow-up

Initial blood tests completed. Gastroenterology assessment and colonoscopy pending.
